Local Design-Build Landscape Company takes “Best in Show” at the 2012 Philadelphia International Flower Show.

The Philadelphia International Flower Show is the nation’s premiere horticultural event, an award-winning destination consistently ranked in North America’s Top 100 events; featured in the best-selling 1,000 places to visit before you die; and known throughout the world as a must-see for flower and garden lovers.

Joe Palimeno President and Landscape Designer of Ledden Palimeno Landscape Company is Celebrating the victory for the Exhibit his company designed and built for the **EP Henry Corporation** from Woodbury NJ. This marks our eleventh year designing and building exhibits for EP Henry and our fourth “Best in Show”

EP Henry is now in its 105th year in business and continues to be cutting edge with current and new product development. EP Henry manufactures a full line of Hardscaping™ products and concrete masonry units in six fully automated manufacturing facilities. EP Henry is still family owned and operated, for four generations and has remained an industry leader in providing innovative products for a wide range of masonry, paving and landscape applications.

‘Ohana Ho’olaule’a (family celebration)

Is our theme and it celebrates outdoor living at its finest." Functional usable outdoor spaces that offer privacy and a place to escape to never go out of style," says Palimeno. Roofed structures-covered patios are popular as well, offering the feel of an outdoor room that provides comfort from the sun.

The Flower Show puts us in front of 275,000 visitors over an 8 day period to showcase all the possibilities of what you can have in your own backyard.

In addition to the **EP Henry** exhibit in Philadelphia, we also designed and built two exhibits for **Subaru of America** the premier sponsor of the **Philadelphia International Flower Show** and while the Philadelphia show was being installed we had a crew building an exhibit at the Seattle Washington **North West Flower and Garden Show** where they are also the premier sponsor”.

Subaru of America, Inc. is a wholly owned subsidiary of Fuji Heavy Industries Ltd. of Japan. Headquartered in Cherry Hill, N.J. All Subaru products are manufactured in zero-landfill production plants and Subaru of Indiana Automotive Inc. is the only U.S. automobile production plant to be designated a backyard wildlife habitat by the National Wildlife Federation. Four exhibits in three weeks and 10,000 miles of flying in between to manage both events is what it took to pull off over 5000 square feet of living exhibit space.

We are looking forward to Spring and all signs are pointing to a very good season ahead with the responses we have received from the show and our clients that have seen the show. Now is a great time to invest in your home not only to increase the real estate value but most importantly for the lifestyle you get for family and friends from a properly designed outdoor space.

Ledden Palimeno Design-Build excels in single-source design-build. Functional and usable outdoor spaces and gardens, customer service and exceptional attention to detail, and quality craftsmanship.

EP HENRY Best In Show
